

## SEE BOTTOM OF THIS PAGE "ALERT" COLOR CODING

## Conventional Nisdom - part 1

## OVERVIEW

The very first box is for the pair's general approach (Standard American, 2/1, Precision etc.), which is similar to the old card, but features a new line: Min Expected HCP when Balanced, with spaces to enter numbers for Opening and Responding. For example, if in your partnership you agree to open all balanced 12 -counts and respond with a balanced hand with 6 HCP, then you would write 12 and 6 in the lines provided.

Notrump ranges considered "weak" can range anywhere from as few as 10 up to 15 HCP. Is 13-15 a weak notrump? That is up to your partnership as defenders to decide.

Some partnerships play weak notrump when nonvulnerable and strong when vulnerable, or in different seats (weak in first or second, strong in third and fourth). Checking this box is not meant to describe the variability, just to alert the opponents of its existence.

Forcing Open: 1\% $\square 2 \% \square$ Other

Next, we have Forcing Open, with the normal 1\% and 2\% options, plus Other.

There are boxes to check whether your 1NT openings are strong, weak or variable.

Strong generally includes any notrump range with 14 as its lowest possible.

## with

Bids That May Require Preparation. Kind of like a "pre-Alert," this space is available for you to include artificial bids that your opponents may want to discuss their defense to in advance. A good example is Flannery, an opening bid of 2 which shows $11-15$ HCP with five hearts and four spades. Again, there is room below to articulate your methods. This is just to summarize your system.
$\qquad$

## MINORS

The areas for 1\% and $1 *$ have been separated. For most players, there may be no need to differentiate between their responses to $1 \%$ and $1 \diamond$. If that is the case, you can simply check the "Same as over 1e3" box in the 1 area.

With the popularity of strong club systems and "could be short" club openings, with or without transfer responses, the section for 1\% opening bids has been expanded. There are several options to check to indicate your agreement about minimum expected length. As with the old card, bids in blue require an Announcement, bids in red require an Alert.

Bids That May Require Preparation
+
-
$\qquad$

Indicate your agreed-upon Minimum Length by checking the appropriate box in the top row.
The area for Responses has been expanded for you to detail your methods. The $1 \diamond / 1 \mathrm{NT} / 2 \mathrm{NT}$ section is very similar to the old card.

In the $1 \leqslant$ section, in addition to the various options for minimum length, there is also an option to check that your $1 \leqslant$ opening promises an unbalanced hand. single raise invitational or better? Is it game forcing? What about jump raises? It is here that a new option for a jump raise of a suit debuts: the "mixed" raise. What is a mixed raise? It might be described as "single raise values with extra trump." Distribution is subjective, depending on a player's evaluation. For example, if balanced, they might have more toward the upper range of high-card points. If the hand contains shortness, perhaps fewer high-card points.

Lastly, there are three op tions for what a jump raise means after the opponents overcall.

## MAJORS

The first boxes are for the normal expected length when your side opens one of a major. This is divided into $1^{\text {st }} / 2^{\text {nd }}$ and $3^{\text {rd }} / 4^{\text {th }}$ (to indicate which position you might open a four-card major).

The next line covers 1NT responses. F is for Forcing 1NT; responder expects opener to bid practically $100 \%$ of the time. Semi-F is for Semi-Forcing. This means responder can have up to invitational values, but opener is allowed to pass, usually with a balanced minimum. The Bypass A box is checked if responder routinely bids 1NT with four spades; usually because the pair plays Flannery. If you respond 1NT with four spades and three hearts in a normal context, do not check the Bypass A box.

Next is Drury. This is an artificial raise by a passed hand. You can choose $2 \%$ or 2 (or both) and indicate if you use these bids In competition; for example, over doubles but not after an overcall.

The Other section is for agreements not covered by the boxes. Some examples might be: $3 / 1$ invitational, game-try agreements, or perhaps follow-up bids after 1NT responses

On the right, describe any artificial raises. In addition to the 2NT/3NT/Splinter check boxes, you can indicate conventions like Bergen raises in the Other area.
$\qquad$

Jump Raise describes your agreements about 1M-3M.

Weak implies less than a constructive raise with four trumps.

Mixed can be described as "single raise values with extra trump." Distribution
is subjective, depending on a player's evaluation. For example, if balanced, they might have the upper range of high-card points. If the hand contains shortness, perhaps fewer.

Invitational is a raise that isn't forcing to game.

1NT opening bids
If you play a variable notrump, there is space for two different ranges; use both areas if you vary your range either by seat or vulnerability.
You can indicate how you vary in the area that says Seat/Vul.
If you use two different sets of responses to your variable 1NT ranges, check the Same Resp No, otherwise, check Yes.
5-Card Major: Check this box if you might have a five-card major when you open 1NT.
Sys On vs: How does your partnership handle interference? It is common to play "systems on" versus a double and $2 \boldsymbol{2}$; you can write your agreement here.

2c\% Stayman: Most will check this box; if you play some version of $2 \omega$ puppet or something else, check the appropriate box.
$2 / 2 / 2 \propto / 2 N T$ : You have the choices of Natural, Transfer or Other. If $2 \oplus$ is minor suit Stayman or anything other than natural or a transfer, indicate that in 'other.' A transfer shows a specific suit; if 2 A could be either minor, that is 'other.'

Smolen: Smolen is a conventional bid that allows - responder to show both majors
: after opener's 2 answer to
: Stayman.
: Transfer 4\% $/ 4 \diamond / 4 \vee$ :
: If you play these calls - as transfers, check the : appropriate box.
: Dbl: If the opponents : overcall, indicate whether a

- double is negative or penalty.
: You can also indicate the
- level through which the
: negative double applies, or
: other treatments for double
- (like stolen bid, for example,
: where a double means you
: would have made the bid your
: opponent did).

1NT_to_(Same Resp: $\mathrm{Y} \square \mathrm{N} \mathrm{\square}$ )

## 2NT

Similar to the 1NT section, there is space for your range and a box to check (Conv in red) if your 2NT opening bid is conventional (outside of the expected strong, balanced hand).

Puppet: Check this box if your partnership plays any variation of : puppet Stayman (a method of finding out if opener has a five-card - major suit).
$3 \boldsymbol{A}$ : Unless you play $3 \boldsymbol{A}$ as natural, check this box and indicate : your agreement in the space provided. Minor suit Stayman or : an artificial relay to 3 NT (with follow-ups to describe various : distributional hands) are the most common treatments.

Tfr: If your three- and/or four-level responses are transfers, check : these boxes.

Neg Dbl: Should the opponents interfere after a 2 NT opening bid, : you can indicate how you handle it.

## Two-level opening bids

The 200 box has something new that is important: Very Strong vs Strong. Some extra terms and options have been added to the new card to reflect this. The old card simply had options for $2 *$ as "strong" and "other." There are now restrictions on 2\% openers that didn't exist before. Not all events allow a Strong artificial $2 \%$ opening bid. If it is allowed, it must be Alerted.

Very Strong: A hand that contains: at least 20 HCP, or at least 14 HCP and is within one trick of game, assuming suits break evenly among the other hands, or at least 5 Control Points (Ace $=2$ points, King $=1$ point) and is within one trick of game, assuming suits break evenly among the other hands.
Strong: A hand that contains: at least 15 HCP, or at least 14 HCP and meets the Rule of 24 (number of cards in two longest suits plus number of high-card points must be at least 24), or at least 5 Control Points and is within one trick of game, assuming suits break evenly among the other hands.

Natural: Many strong-club systems such as Precision use a 2\% opening bid to show a limited hand with a five-card or longer club suit.
Conventional: If your 2*0 opening bid is anything other than Very Strong, it must be Alerted and fully explained.

## Responses to 2\%

## : 2 Neg or Waiting: No Alert required.

: Steps: There is a line next to the Steps box to indicate if you play steps showing levels of high card points or Control Points-showing steps.
2v Neg: If you play $2 \boldsymbol{v}$ as an artificial negative bid, then you must Alert
Other Use this space for a general explanation of conventional responses to a natural or conventional $2 \%$ opening bid.

What used to be called OTHER CONVENTIONAL CALLS is now just OTHER. While several common conventional gadgets are specifically mentioned, there are extra lines provided at the bottom for partnerships to write in additional treatments they employ.

ery) Str Open There - are many conventional ways - to interfere with the oppo-- nents' auctions, even if they - are showing a Strong or Very
: Strong opening bid, such as - Mathe (double for the majors, : notrump for the minors), trans: fers, CRASH (step-bids which - show a two-suiter of the same : Color, RAnk or SHape), or - suction. There is plenty of room : to describe your partnership's - agreements, if any.

Jump Shift Resp The old card had only two options: Weak Jump Shifts In Comp and Not in Comp. There are also fit-showing jumps, artificial raises, mini-splinters and differences as to whether responder or advancer is an unpassed hand or a passed hand. (Another common abbreviation you might see on a card is BPH or BUPH -- by passed hand or by unpassed hand.) Conventions are sometimes "off" in competition. There is a lot of room to explain your Jump Shift Responses (and advances), but weak jumpshift responses not in competition no longer require an Alert.

## NMF (New Minor Forcing)

After any auction that begins $1 \mathrm{~m}-1 \mathrm{M}$; 1 NT , responder bids two of the other minor to ask opener to clarify their : major-suit holdings. It is an artificial call, requiring an Alert : Opener can show three-card support for responder's major, or four of the other major, or deny either by bidding 2NT or (re)bidding a minor suit. Typically, responder will have invitational (or better) values to use NMF.

## 2Way NMF (Two-Way New

Minor Forcing) Similar to NMF, this refinement allows responder to initiate invitational or game-forcing sequences - regardless of which minor was opened - by utilizing 2\& as an artificial relay to 2 to show an invitational hand, and $2 \star$ as an artificial game-forcing bid. Both bids require an Alert.
: XYZ This refers to any three : one-level bids made by the - partnership (1X-1Y; 1Z). The : concept of 2Way NMF now - applies, where $2 \&$ would relay : $2 \checkmark$ to begin an invitational se$\therefore$ quence, and $2 \diamond$ is an artificial - game force.
$4^{\text {th }}$ SF (Fourth Suit Forcing) This is a - common bidding tactic by responder : to force opener to keep bidding. After : three suits have been bid naturally, the "fourth suit" is now a (possibly) : artificial (Alertable) call that is forcing. Depending on your agreement, it can : be forcing for one round or to game (1Rnd or GF).

Common treatments you might describe in the lines at the bottom include defenses to the opponent's "unusual" bids, such as 2NT showing a two-suited hand. Methods or agreements after reverses and 2NT rebids are often listed here. Any other general agreements that do not fit into other boxes, or clarifications, can go in this space.

> In each of the next several issues, we'll break down a section of the new ACBL convention card. See pages 18-19 of the March issue for the complete card and a glossary of terms and abbreviations.

## Conventional Visclom - part 6

| You | LHO | Partner | RHO |
| :--- | :--- | :--- | :--- |
|  |  | 1\& | Pass |
| 1- | 1ヵ | Dbl |  |

ple, if partner opens the bidding 1A and your RHO overcalls $2 \star$, a double by you shows length in hearts and clubs. A typical responsive double is when your partner makes a negative double (showing length in the unbid suits), and you would like to compete but have no clear direction, so you double.

Support doubles occur when partner opens the bidding, you respond in a suit and there is competition. Your partner, the opener, can double or redouble to show exactly threecard support for the suit you bid.
card support for the suit you bid
the bidding with very few high-card points. Yet, for all the bidding that can occur at low levels, many doubles there are played as levels, many doubles there are played as
something other than penalty. There are more opportunities to use these versatile doubles as showing the unbid suits or support for partner than a desire to defend.
Negative and responsive doubles tend to show support for the unbid suits. For exam-

Bridge is very competitive. Uncontested auctions are increasingly uncommon as players often enter

Most partnerships play support doubles through to a lower level because it could be that you have a seven-card fit. For example, if the intervening bid had been $2 \boldsymbol{A}$, you and your partner need to discuss whether the double would still be support.

For Negative, Responsive and Support doubles, check the box and indicate how high you play that type of double. For example, if you play Responsive doubles through 4 , check the box and write $4 \diamond$ in the line next to "Thru." Note that Support doubles and redoubles (Rdbl) are not in red and no longer require an Alert.

Immediate Penalty doubles at low
levels are so rare that they do require an Alert.

Maximal doubles occur in competitive auctions typically after the opponents interfere and take up bidding room. In certain situations (usually at the three level), a double of the opponents' suit becomes a game try. A classic example:

| You | LHO | Partner | RHO |
| :---: | :---: | :---: | :---: |
| 14 | $2 v$ |  | $3 \vee$ |
| Dbl | 2 | 2a | 3 |

Some pairs define a double by opener as a hand with game interest.

T/O Style This line isn't to let the opponents know if you prefer Chinese or Thai food, it's your "takeout double style." Some partnership agreements on takeout doubles include offshape hands, balanced hands, "card-showing" doubles or takeout doubles with hands that are less than opening strength. Your partnership's general approach to takeout doubles can be noted on this line.

## Conventional Visdom - part 8

> In each of the next several issues, we'll break down a section of the new ACBL convention card. See pages 18-19 of the March issue for the complete card and a glossary of terms and abbreviations.

When your LHO opens one of a suit, and your partner bids two of the same suit, that is a direct cuebid. What does it mean? : The first column is for Artificial ("Art") openings of $1 \%$ and $1 *$. Does a direct cuebid by your With the proliferation of "could be short" : side show length in both majors? Then you would check the Michaels box.

- What is Michaels? It is a way to show a two-suited hand: A direct cuebid of a minor-suit : opening bid shows a major two-suiter. So, the auction 1*-(2*) or $1 *-(2 *)$ shows a hand and artificial minor-suit opening bids, the new card has more options for your partnership to indicate if you have different with length in hearts and spades. The strength requirements vary depending on partnership : preferences. After a major-suit opening, a direct cuebid shows length in both the other major - and a minor. The sequence $1 \boldsymbol{A}-(2 \boldsymbol{A})$, therefore, shows length in both hearts and an undis-- closed minor. opening bid. Note that 1v and 1A opening bids are always treated as natural.
: The next column is for Quasi-Natural : ("Quasi") 1\% or 1 opening bids, - which could be balanced hands with : two or more of the bid suit or nat: ural length. Opponents who play a : quasi-natural opening bid are required : to pre-Alert along with announcing, : "could be short as X." Again, you have - the option of Michaels, Natural or : Other for your direct cuebids.
: If your opponent opens a "could be as short as zero" 1 *, does 2 by you : show diamonds? Then you would check : the Natural box. If a direct cuebid is : something other than Michaels or Natu: ral, you would check the Other box.

> This section is to indicate your partnership style when making a preemptive opening bid at the three or four level. Typically, these bids promise a hand below opening strength with a seven-card or longer suit. Suit quality and length can depend on seat and vulnerability. There is space to note your general preempting philosophy at these levels. How do you respond to such opening bids? For example, a new suit could be natural and forcing, a control bid in support or even ace- or key card-asking. A new-suit, below-game response that is non-forcing is Alertable

This section allows you to briefly describe your conventional slam methods. Almost all of these treatments are Alertable, but they are "Delayed Alerts." All Delayed Alerts must be explained before the opening lead by either the defending or declaring side.

What is a Delayed Alert and why?
In any case where a bid is Alertable, but the bid is 3NT or higher, and the auction is at or beyond opener's rebid, delay the Alert until the end of the auction. Additionally, Control Bids should be Alerted at the end of the auction even if they are below 3NT. Alerts of passes, doubles and redoubles are not delayed regardless of the level of the auction. When behind screens or online, do not delay any Alerts.
Because most artificial calls at high levels indicate some slam interest, immediate Alerts (or lack thereof) could potentially benefit the Alerting side more than the non-Alerting side.

## : 4\% Gerber

: The Gerber convention is an ace-asking bid.
: Typically, it's a jump to 4\% after an opening : notrump sequence or after a notrump rebid. Some $\therefore$ use it after a fit in a suit has been found. All three : options are available for you on the new card:
: Directly Over NT such as: 1NT-4\& or 2\&-2 ; : 2NT-4\%.
: Over NT Seq such as: 1-1V; 2NT-4\&
: Non-NT Seq such as: 14-3A; 4\&
: Note that the first two examples are not Delayed
: Alerts, but the third one is.

When your RHO has opened the bidding, you are now in the "direct seat" in terms of overcalling. If RHO opens at the one level in a suit, you have a Direct 1NT bid available to you. Most people play that a direct seat overcall of 1NT shows just what it would if you opened a strong notrump - maybe even a little better - 15-18 HCP. Notrump overcalls do not require an Announcement of your high-card point range. If a partnership agreement allows for "ostensibly natural" notrump overcalls that do not meet the definition of Natural (hands which contain a small singleton or 10 cards in two suits), it is both permitted and Alertable. The call is also Alertable if it does not show at least 14 HCP.

Previously called "Defense vs Notrump," this is one of the boxes on the new card that is virtually identical to the box on the old card. A handy new element is a line for 2NT. Because many partnerships like to play different systems depending on the strength of the 1NT opening bid (or overcall), there are two columns provided. On the top two "Vs" lines, you might indicate the point-count range that your system defends against, or if you differentiate between direct or balancing seat actions.

Next to each two-level suit bid, indicate what that means in your partnership. For example, if vs a strong 1 NT , you play $2 \%$ as a one-suited hand, write "one suit" in the line. But, if vs a weak 1NT, it's both majors, write "majors" or "hearts and spades" in the line. Or, if it's natural, write "clubs" or "natural." Note that these lines are not in red, but if your bid is conventional, meaning anything but natural, or natural but also indicates a second suit, it requires an Alert.

## vs TAKEOUT DBL

Your partner opens the bidding and your RHO makes a takeout double. What do your bids mean?
: New Suit F "F" stands for Forcing. If a new : suit at the two-level by responder is forcing, check the 2 Lvl box.
: If a new suit is a transfer to the next-higher : suit, check the Tfr box and mark the lowest : call where transfers start (e.g., 1 NT is a : transfer to clubs) and remember that opener - must Announce the transfer suit.

Jump Shift Is a jumpshift by responder weak, invitational, forcing or fit-showing? Check the appropriate : box and note that fit-showing jumps - are Alertable.
: Redouble If redouble has no : artificial meaning and is values-- showing, check the $10+$ box. If - you have a specific partnership : agreement about redouble, or if : it is conventional, check the box - next to Conv and explain in the - line provided.
vs TAKEOUT DB

$\longleftarrow$ 2NT After your RHO doubles, if 2NT is - natural (balanced), or a raise (Alertable), indicate your agreement, the high-card : point range you are expected to have and : note if you play it differently over your
There is an Other line for any other partnership agreements over an opponent's takeout
double.

# Conventional isclom - part 12 

> In each of the next several issues, we'll break down a section of the new ACBL convention card. See pages 18-19 of the March 2022 issue for the complete card and a glossary of terms and abbreviations.

When your opponent opens the bidding at the two level or higher, how does your partnership handle it? (Note that "preempt" doesn't necessarily mean "weak." Some systems include two-level or higher bids that are "intermediate" or near-average to average strength.)
: 2NT Overcall When they pre: empt at the two level, what is the : high-card point range of your 2NT - overcall? There is enough room : to indicate if you play "systems : on," i.e., Stayman and transfers or : natural responses. If you play this is - conventional (such as both minors), : it is Alertable.
: Cuebid Depending on the level, : cuebidding the opponent's suit - can have different meanings, : such as stopper-asking or show: ing a two-suited hand. Indicate - your agreement if you have one.
!...................
: T/O Double Thru After the : opponents preempt, what does - a double mean and through - what level? For example, if : you play double is takeout : through $4 \vee$, write $4 \vee$ in the - space provided. If doubles of : preempts are for penalty, check : the box and Alert.

## : 2NT Lebensohl Resp After an

: opponent preempts at the two

- level and your partner makes a
: takeout double, what does your
: bid of 2NT mean? If it is an offer : to declare a notrump contract,
- then it's natural and not Alertable.
: Many partnerships play a conven : tion called Lebensohl, which has : many uses. Playing Lebensohl, a - bid of 2NT after partner's double : is not natural, it is Alertable and : asks partner to bid 3\%. There : are many different follow-ups and - continuations; be aware of the : Alert procedures and explain fully : when asked about your bids or : before the opening lead.

Jump Overcalls How do you play a jump : overcall after a preempt? Describe the - strength expected.
: Other There are many - conventional gadgets one can - play after a preempt, often : to show two-suited hands. : Indicate if you play conven-- tions here.

## Conventional Visdom - part 13

> For one more issue, we'll break down a section of the new ACBL convention card. See pages 18-19 of the March 2022 issue for the complete card and a glossary of terms and abbreviations.

#### Abstract

CARDING The last four boxes of the new convention card are all about your partnership's defensive play agreements. Defense is $50 \%$ of the game; the new card has devoted additional space for your partnership agreements. The first options in the CARDING box refer to your count and attitude methods, and whether they vary if you are defending a suit contract or a notrump contract. It is now easier for a partnership to indicate if they play, for example, upsidedown attitude but standard count, and if that changes based on the strain of the contract they are defending.

 -SIGNALS The first options in the Signals box are your Primary Signals to either declarer's lead or partner's lead For example, if dectarer leads a suit and you agree to give count, you would check the Count box. If your primary signal to partner's lead is attitude, you would check that box. You might even number them in order, for example, Partner's lead: Primary is attitude (1), then count (2), then suit preference (3).

Exceptions An exception to your carding might occur if you agree to give count or attitude when a certain card is led.

## Exceptions An

 : exception to your - primary signal might : occur when there is : shortness in dummy : or an obvious switch situation.
## Exceptions

$\qquad$
First Discard: Std $\square$ Upside Down $\square$ Lavinthal $\square$ Odd/Even $\square$ Other $\square$
Other Carding If you have Exceptions or Other Carding - agreements, there is a line to indicate what those might be, such as Foster echo or upsidedown suit preference.

## : Smith Echo Smith Echo is a sig

 : nal in declarer's first led suit that - is about a different suit. There : are many different varieties; : check the appropriate box if you : play this convention and indicate - any exceptions or agreements in - the line provided.: Trump Signals If your partnership - has an agreement on certain card-- ing methods when you follow suit : to trump, you may indicate it here. : One common example is trump suit preference.
: First Discard When you cannot follow suit, your first discard is an opportunity to tell partner something about your hand (or not). If you play Std (standard) or Upside Down, a high or low card is either encouraging or discouraging in that suit. Two other popular carding conventions are Lavinthal (the defender is not interested in the suit discarded; the size of the spot card indicates whether they want the higher or lower of the other two suits) and Odd/Even (an odd card encourages that suit, : even discourages and could be a suit preference indicator). There are many Other types of discards and : plenty of space to note what you play.

: Length Leads The first options
: in both boxes (vs suits and vs : notrump) refer to your leads
: from holdings of three or more - cards. $4^{\text {th }}$ best, $3^{\text {rd }} / 5^{\text {th }}$ or $3^{\text {rd }} /$ : low are the first options, as : are "attitude" leads. Against : suit contracts, if you lead small : from a doubleton, it no longer - requires a pre-Alert but it must - be marked on your card and : explained if asked about leads : and carding.
: Next there are various card com: binations; you can circle the card : led (if not in bold) as per your : partnership agreements. Note - there are fewer card combina: tions listed; this is to encourage : notating on your convention card: : your methods. "H" means any : honor.

LEADS The last four boxes of the new convention card are all about your partnership's defensive play agreements. Defense is 50\% of the game; the new card has devoted additional space for your partnership agreements. In this issue, we tackle Leads Vs Suits and Leads Vs NT.

## : After $1^{\text {st }}$ Trick If

: your leads change

- after the first trick
- for example if you
- play $3^{\text {rd }} / 5^{\text {th }}$ leads but
: then $4^{\text {th }}$ best, you : can note it here. You - can also indicate if - you change from a - count-based spot : card to attitude. This : applies to both suits : and notrump.
$\qquad$
- 
- Interior Sequence
: Circle the honor card : led (if not in bold).
: Note any exceptions.
: Honor Leads Circle which you lead
: from A-K-x or longer, and if it varies.
: One example might be if you normally
- lead ace from A-K, except at the five
: level or above you lead the king, asking
: for count.
: Circle the honor card led (if not in bold).

The options are almost identical for leading against notrump contracts. If you lead second highest from a four- or five-card suit that does not contain an honor card, there is a box for you to note that.
