

Work out and enter the score for each of the following results:

First look at the contract and result and decide whether the contract was made or defeated.

If the contract was not made you award undertricks according to the number of undertricks, the vulnerability and whether the contract was doubled. (See the lesson notes).

If the contract was made, you work out the Trickscore earned by the contracted tricks, (NOT the overtricks). If the total is less than 100, the bonus is a part score (50). If the Trickscore total is 100 or more, the bonus is 300 if Not Vulnerable, or 500 if Vulnerable.

Then add on points for any over tricks.

IF the score goes to North / South, you write it in the "Plus" column. If the score goes to East / West, you write it in the "Minus" column.

North/South are Vulnerable

East/West are not
